Bug-Tracking Naegling

BugID	Discovery Date	Date Resolved	Person reporting	Priority	Location	Type	Description	Resolution
1	5/2/2014	5/2/2014	Mikaela	low	app	runtime error	Application crashes when trying to log in	I replaced my code with Johans code and it fixed it!
2	5/2/2014	5/2/2014	Elsa	medium	git bash	merge error	Cannot merge Master with my branch	I had to make a new repository and it worked
3	5/2/2014	5/2/2014	Simonas	medium	eclipse	configurations	Eclipse configurations preventing the app from starting up correctly	With a team member's help I fixed the configurations
4	5/2/2014	5/5/2014	Simonas	low	app	out-of-date software	was required to update Google PLAY software, which was preventing the app from running	Signed in with my real e-mail account (instead of the mock ones used for simulation within the app database) and updated the software.
5	5/5/2014	5/5/2014	Simonas & Elsa	high	app	compile error	When we created a new activity all activities in android project showed "R cannot be resolved" bugs	Eclipse automatically created a second library project, which caused duplicates and bugged the program. Deleting the auto-created projected fixed the problem.
6	5/5/2014	5/8/2014	Mikaela	medium	app	function error	When logging out after being in the profile we can use the "back button" on the phone to go back in to profile page.	We solved it when we added the menu option to the profile page, so we can now log out from it as well. And we also added so that the activity finished when the backpress button was pressed.
7	5/5/2014	5/6/2014	Mikaela	high	app	JSON parser error	When trying to get the statistics information and it should be getting the profileTag but it gets the loginTag instead Oo	Fixed by correcting deeper issues in the php code
8	5/5/2014	5/6/2014	Simonas & Elsa	medium	app	compile error	Following instructions from Android Developer tutorial and ran into a problem where a method "getActionBar()" cannot be converted from one library to the other.	StackOverflow suggested to change "getActionBar()" (which is what android developer tutorials said I should use) to "getSupportActionBar()". The app seems to be working as intended after that.
9	5/6/2014	5/6/2014	Mikaela	medium	app	logical error	When trying to assign the number of deaths to the textview it says that there is no value in deaths, but there clearly is a value when looking at the JSON object	glancing over the code I realise my stupidity... I tried getting deaths from the kills function -.-'
10	5/6/2014	5/6/2014	Mikaela	medium	server/app	functional error	The php mysql-queries are not working on Davids Server but they're working on Johans server, why is this?	The config file was not updated propperly on the server
11	5/7/2014	5/7/2014	Mikaela	medium	mysql	logical error	The query says that there's no data to fetch when there is data in the database.	We had not conditioned the query propperly with our inner joins.
12	5/7/2014	5/7/2014	Elsa	medium	server	code error	The test.php echoed information that was deleted from the index.php	The index.php had saved old information on the server but no in the visably in the file. deleted the data and it worked.
13	5/7/2014	5/7/2014	Elsa & Simas	high	app	compile error	The app crashes when selecting Friend view in menu	problem in the coding
14	5/7/2014	5/7/2014	Elsa & Simas	medium	app	logical error	When choosing to look at the friendlist it is empty on the app even though there are friends in the tableF	Elsa and Simas using to different users..
15	5/8/2014	5/9/2014	Simas	medium	android	lack of knowledge?	Unable to make two different tabs have different elements, which is a problem because a friend list does not need a text box, and having a list of friends is not needed in add friends tab.	NOT SOLVED: It appears we need to have a whole new class to allow different tabs to have different fragments, but it seems too time consuming and most likely would not work to begin with, so instead we decided to use regular fragments with buttons.
16	5/8/2014	5/9/2014	Elsa	medium	server	logical error	Cannot retirve more than one friend from the friendlist	Needed to make the result of the query into an arraylist
17	5/9/2014		Simas	high	android	android runtime	Apparantly the fragment in XML folder is being given the wrong name, which makes the app crash when the activity tries to display that fragment.	
18	5/9/2014	5/9/2014	Henrik	low	android	function error	When missclicking the register button you can't go back to the login page	Removed the finish line from the onClick listener of registration.
19	5/11/2014	5/19/2014	Mikaela	low	Json	logical error	When storing the user in the target table the echo response is that it was unsuccesful, yet the user gets stored!	assume that it's true and it wont do it!
20	5/11/2014	5/19/2014	Mikaela	high	SQL	logical error	Getting myself as a target.	It's working now Oo
21	5/9/2014		David	low	app	knowledge issue	Not being able to remove the friendMarkers once showing up	
22	5/11/2014	5/12/2014	Elsa	medium	app	logical error	Was not able to show friendlist because I could not access a userID without be logged in	Create simple login function
23	5/12/2014	5/12/2014	Elsa	medium	app	compile error	The "simple" login function crashed once I tried to add a new activity.	No solution was found. THe app is not able to run on emultar so decided to wait until I had access to a android phone.
24	5/12/2014	5/12/2014	Elsa & Simas	High	app	Evil error	Instead of selecting the friendlist the app decided to show all online users even though no data concerning this was being used	WE LITERALLY HAVE NO IDEA IT JUST SUDDENLY WORKED
25	5/12/2014	5/12/2014	Elsa	medium	SQL	logical error	Sending a friend rewuest works but the test shows that it skips one step and gives an error. Dont know if it needs fixing, will look into it	It was an fault in the code, an unnessecery if statment has been removed
26	5/13/2014	5/13/2014	Mikaela	high	JSON	runtime error	Json weren't able to parse data from one of the queries. returning "tag not found"	Turns out someone deleted the tag in the index.php document!
27	5/14/2014	5/22/2014	David	high	Gps connection	runtime error	If the device doesn't get GPS signal, it crashes	App now handles GPS disabled
28	5/14/2014	5/14/2014	Henrik	medium	app	logical error	The "kill roll" doesn't get a higher value when adding the kill bonuses from the items to the roll.	Made a sql query to get the items instead of trying to recieve them from the profile.
29	5/15/2014	5/15/2014	Simas	high	android	AndroidRuntime	Trying to convert an array list into a viewList on Android's display screen. The first one works fine, but the second one for some bizzare reason makes the app crash citing "nullpointerexception"...	problem was caused by adapter using the current content view of onCreate (I think...), which meant that using different layout was the problem. Instead I use one xml layout for 2 different arrayadapters and 2 listviews
30	5/16/2014	5/16/2014	Simas+Elsa	medium	php?	code error?	The android app no longer display a name, but a list of all the table values for certain names. Most likely an error in php queries.	The names for index and db_function were wrong, changing them fixed it.
31	5/16/2014	5/22/2014	Simas & Elsa	medium	android	logical error	When the list are empty they show wrong lists. RequestList shows friendList if empty and friendList shows all online users if empty	If a list was empty it did not return an empty list because JSON wasnt encoding anything beyond a full list
32	5/19/2014	5/22/2014	Johan	high	android	android runtime	App crash. NullPointerException in .Target.getRandomTarget if no more user than the player is online.	Added check for no users online and a toast is shown informing user.
33	5/19/2014	5/19/2014	Henrik	medium	android	nullpointer	When loading the Ranking view the app gets a NullPointerException refering to the friendRanking	Made the query return an empty array upon false data.
34	5/19/2014	5/23/2014	Mikaela	high	android	logical error	when someone doesn't have any deaths they don't show up in Top-rank because we can't divide by 0	instead of dividing the kills with death we will do kills minus deaths for the ranking
35	5/20/2014	5/20/2014	Henrik	high	android	runtime error	The app freezes sporadically when running	There was server issues that made the application crash and freeze
36	5/22/2014	5/22/2014	Johan	high	android	runtime error	In calculatng distance NullPointerException if there is no result from lastKnownLocation from GPS provider.	Added if statement to handle error.
37	5/23/2014		Henrik	low	android	visual error	When running the app on a device with a smaller screen the "Assassins" in the login screen clashes with the e-mail textfield.	
38	5/23/2014	5/25/2002	Henrik	high	android	logical error	When changing activity, the user becomes offline	Removed setOnlineStatus in pause.
